

2.1.1906 Part 4 Section 7.6.2.39, LCID (Locale ID)

02/14/2019 • 5 minutes to read

a. *The standard says LCID represents the source's language.*

Word uses LCID as the language to format the source when the documentation style in use has language-dependant variability.

b. *The standard does not allow 0 as a value for LCID.*

Word sets LCID to 0 to mean the value should be determined at runtime by the application.

c. *The standard states that the LCID table in ST_LangCode shall be used to associate language IDs with languages.*

In Office, this element represents the language that shall be used to format the source. The set of locale IDs used by Office are specified in the following table.
